-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Craig et al.

Craig teaches a water muffler in figure 5 including a single expansion chamber **168** and resonator **174**. Water is introduced at **136**. Since a muffler is intended to reduce exhaust noises, inherently noises of certain frequencies will be lowered. These will inherently be lower than other known frequencies, and therefore “low”, being a relative term is met by Craig. Furthermore, Craig specifically discusses reduction of exhaust noise at particular frequencies, some being lower than others.

A plate **138** is provided in an upper region, upon which will impinge incoming water flow. Such a plate is therefore a “water-controlling plate” as claimed. The size of the plate in comparison with that of the muffler will yield a cross-sectional area of the plate being approximately half that of the muffler.

Inlet **78** and outlet **20** pipes are provided.

Re claims 4 and 11, note the figure 6 embodiment of Craig, which is applicable, and provides a short communication pipe between resonator and expansion chamber.

3. Applicant's arguments filed 8/17/2005 have been fully considered but they are deemed moot in view of the new grounds of rejection.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ed Swinehart whose telephone number is 571-272-6688. The examiner can normally be reached on Monday through Thursday 6:30 am to 2:00 pm..
